Widespread large natural wet loose in Bridgers

Bridger Bowl
Bridger Range
4/19/2019
Code
WL-N-R2-D1.5-S
Elevation
8000
Aspect Range
NE-E-S
Latitude
45.90720
Longitude
-110.97500
Notes

Today (4/19/19) there were more and larger wet slides in addition to those that slid yesterday. Activity started before noon and slides were D1.5-D2 wet loose. One wet slab released north of Bridger Peak around 1400, probably from a cornice fall. There was widespread activity in addition to yesterday's slides on all slopes from Bridger Peak through Frazier Basin.

Multiple Avalanches
