 45-55: Ve  
 45-55: Pro

**Notes:** We noted a very weak snowpack structure on nearly all aspects in Hellroaring Canyon in the Centennials. Huge layers of facets u snowpack. Although we did not get positive ECT results at 7,800', we believe there just hasn't been enough slab deposited on t structure to activate it. These persistent weak layers are very large and widespread. New and/or rapid snow loading should not b
