

## Avalanches North of Bridger Bowl

Wolverine Bowl

Bridger Range

1/26/2019

Code

SS-N-R2-D2.5-I

Elevation

7500

Aspect

NE

Latitude

45.83480

Longitude

-110.93400

Notes

A group with the MSU advanced avalanches class found multiple [slab](#) avalanches that released at various times during this week's storm. Three of the slides ran for a large portion of their [slide](#) path. One avalanche was large enough to break small trees in the [slide](#) path. Ski tracks nearby suggest this avalanche was skier-triggered. Photo: A. Schauer

Multiple Avalanches

Number of slides

3

Number caught

0

Number buried

0

Number killed

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger

R size

2

D size

2.5

Bed Surface

I - Interface between new and old snow

Problem Type

New Snow

Vertical Fall

200ft

Slab Layer Grain Type

Precipitation Particles
