Activity

Skiing

I was skiing down the apron at Bridger and noticed this slide on Bradley's that appeared to be skier triggered. Picture's were taken at about 2pm. I don't believe this activity was there when I came down the apron earlier in the day around 11:45. I talked to patrol about it and they had not heard anything about it at the time. It appeared both tracks going in, came out.

Thanks for all the work you guys do!

Region

Bridger Range

Location (from list)

Bradley Meadow

Observer Name

Brian O'Donoghue
