

## Large Natural on Saddle Peak, between the peaks

Saddle Peak  
Bridger Range  
12/28/2021  
Code  
N-R2-D2  
Elevation  
9000  
Aspect  
E  
Latitude  
45.79430  
Longitude  
-110.93600  
Notes

From skier obs on 12/31/21: 2 or 3 days ago [Saddle] went to the ground, big, between the peaks, full [track](#). Yesterday quarter Saddle went big as well. Stepped down lower in the [track](#).

the whole basin between the peaks [except a pocket that slid 3 days earlier] pulled out just under the [cornice](#) and went to ground until it went into the narrows and then rode up on a layer until about halfway down and then stepped down another 2-3' and ran at least 2/3 of that run to the traverses back to schlasmans.
