

Bacon Rind

Date

Sun, 01/02/2022 - 13:55

Activity

Skiing

Walkabout around Bacon Rind area, 8000', E aspect. No formal tests performed, poor structure, HS 90cm, basal facets (2-4mm) make up the bottom 25cm of snowpack. Surface hoar formed in the last 48 hours will be something to watch out for moving forward. Kept it mellow and enjoyed the better than expected coverage.

Location (from list)

Bacon Rind

Observer Name

S Gill
