

Upper Pebble creek

Date

Sun, 01/02/2022 - 02:35

Activity

Skiing

Hi guys, this is an actual obs! Not a test this time.

The s. facing side of Pebble Creek was clearly wind affected, by what seemed to be S and SW winds. In leeward areas, skiing was good; in exposed areas, it was only 20cm deep. Strangely, we didn't really observe and hard wind slabs.

Region

Cooke City

Location (from list)

Pebble Creek - YNP

Observer Name

Jim Earl
