

Poor test scores on east face of middle basin @9400 ft

Date

Fri, 11/11/2022 - 10:15

Activity

Skiing

We were at the ridge of middle basin @9400 feet. Before skiing we dug a pit and weren't thrilled with the results. CT broke on the barrier between the fresh snow and the first dump that the area had. We got an ECTP 17 that went all the way across at the same old snow- new snow barrier @ 35- 40 cm from the ground. Stuck to the lower angle terrain and had a great day.

Region

Northern Madison

Location (from list)

Middle Basin

Observer Name

Derek Mitlehner
