

Thin and Variable in YNP

Date

Sat, 12/17/2022 - 11:00

Activity

Skiing

Thin and variable snow pack in the N Fork (?) Specimen creek drainage. Max depth less than 100cm, min depth bare ground. Active wind loading on exposed ridges, multiple whumphs when skinning over wind loaded, low angle slopes. Decent skiing, albeit thin, on low angle W aspects from 8200' down.

Region

Southern Gallatin

Location (from list)

Specimen Creek

Observer Name

G. Stevens
