

Several large wet slides in north bowl

Bridger Bowl
Bridger Range
4/28/2023
Code
WL-N-R3-D2.5
Elevation
8000
Aspect
E
Latitude
45.81560
Longitude
-110.92300
Notes

Pictures from this morning (May 1) but I'm sure these all ran late last week. They took out at least one or two skin tracks set during the big dump (40") that ran right up the center.

Unconsolidated, dripping wet snow this morning mid mountain around 830 AM. Top 3-4" had frozen but soft by 830.

Number of slides
5
Number caught
0
Number buried
0
Avalanche Type
Wet loose-snow avalanche
Trigger
Natural trigger
