

Three storm layers present up high

Date

Sat, 10/14/2023 - 04:55

Activity

Skiing

Three clear storm layers and wind effect piling up larger drifts. Snow height at 9k ft averaged 85-90cm. The rain layer in the center of the pack creating a sheer surface that with more load could trigger the third storm layer.

Region

Out of Advisory Area

Location (from list)

Pine Creek
