

# Avalanche on Saddle Peak

Saddle Peak  
Bridger Range  
2/10/2024  
Code  
L-N-R1-D1-S  
Latitude  
45.79430  
Longitude  
-110.93600  
Notes

From obs: "Witnessed a natural [slide](#)/sluff today day off the top of 1/4 Saddle around 3:30 pm from the Bitterend. Visibility was poor could not see the starting point. The [slide](#) produced a large dust cloud running down the right side of the Football field, which would could have taken a person for a ride. The [slide](#) ran over the cliffs skiers left of Lundy's Luge. The debris covered all the tracks the from the high traverse across the Cueball. Probably would not have buried a person, but certainly would have rocked your world."

Number of slides  
1  
Number caught  
0  
Number buried  
0  
Avalanche Type  
Loose-snow avalanche  
Trigger  
Natural trigger
