

Loose naturals and wind loading in the bridgers

Date

Sat, 03/09/2024 - 13:20

Activity

Skiing

Skied into Frazier basin today. Saw multiple wet loose slides on the SE face across the basin. Winds were stripping many ridge lines and loading N aspects. No avalanches related to wind loading were observed. Pit at the bottom of the basin on a SE aspect around 8200 feet had HS 185 and showed Ectx.

Region

Bridger Range

Location (from list)

Frazier Basin
