

Storm slabs on the Ramp

Date

Tue, 12/31/2024 - 04:05

Activity

Skiing

Toured up the ramp at around 4 yesterday, snow was still falling heavily. Counted 4 or 5 natural storm slabs breaking mostly within the new snow. A skier before us triggered a [slide](#) in the chutes on a [ski cut](#). I struggled to find a clean interface where the storm slabs were breaking on a few hand pits, mostly just a lot of fresh snow.

Region

Bridger Range

Location (from list)

The Ramp
