We saw one old, but very large persistent <u>slab</u> avalanche further up Republic Creek (pictured). It was on similar <u>aspect</u> and elevation as a somewhat more recent persistent <u>slab</u> in nearby Hayden Creek, North-northeast, 10,000'. It appeared to be 6'+ deep and 500'+ wide. The <u>bed surface</u> and crown had been partially drifted in, so it seemed it was probably at least a week old...
