

Small Loose Snow Avalanches in South Cottonwood Basin

Mt Blackmore
Northern Gallatin
2/1/2025
Code
SS-NC-R1-D1
Latitude
45.42980
Longitude
-111.00000
Notes

Skied into South Cottonwood basin from Blackmore today. Skiing was sub-par with lots of wind scouring and intense active snow transport. Along with the slides observed yesterday, two recent R1-D1 slides were observed in South Cottonwood Basin: below the Dogleg and on N Twin's west wall via [cornice](#) break. No [surface hoar](#), slides from today, or cracking/collapsing were observed.

Number of slides
2
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Cornice fall
R size
1
D size
1
Problem Type
Wind-Drifted Snow
Snow Observation Source
[Continued wind around Blackmore](#)
Slab Thickness units
centimeters
Single / Multiple / Red Flag
Multiple Avalanches
Advisory Year
[24-25](#)
